

CODING CHALLENGE

QUESTION1

Change Theme

Language

Java 7

```
5  import java.util.*; ...
9  int[] a = new int[n];
10
11  for (int i = 0; i < n; i++) {
12      a[i] = scan.nextInt();
13  }
14
15
16
17
18 > scan.close(); ...
```

You have earned 5.00 points!

You are now 20 points away from the 1st star for your java badge.

QUESTION 2

```
Change Theme Language Java 7
import java.util.regex.*;

class Animal{
    void walk(){
        System.out.println("I am walking");
    }
}

class Bird extends Animal {
    void fly() {
        System.out.println("I am flying");
    }
    void sing() {
        System.out.println("I am singing");
    }
}

public class Solution{
    public static void main(String args[]){
        Bird bird = new Bird();
        bird.walk();
        bird.fly();
    }
}
```

Congratulations!

You have passed the sample test cases. Click the submit button to run your code against all the test cases.

Sample Test case 0

Your Output (stdout)

```
1 I am walking
2 I am flying
3 I am singing
```

QUESTION 3:

```
Change Theme Language Java 7
import java.util.*;

interface AdvancedArithmetic{
    int divisor_sum(int n);
}

//Write your code here
class MyCalculator implements AdvancedArithmetic {
    public int divisor_sum(int n) {
        int sum = 0;
        for (int i = 1; i <= n; i++) {
            if (n % i == 0) {
                sum += i;
            }
        }
        return sum;
    }
}

class Solution{
    public static void main(String []args){
        MyCalculator my_calculator = new MyCalculator();
        System.out.print("I implemented: ");
    }
}
```

Congratulations!

You have passed the sample test cases. Click the submit button to run your code against all the test cases.

1 I implemented: AdvancedArithmetic
2 12

QUESTION 4

```
1  import java.io.*;
2  import java.util.*;
3
4  public class Solution {
5
6      public static void main(String[] args) {
7
8          Scanner sc=new Scanner(System.in);
9          String A=sc.next();
10         /* Enter your code here. Print output to STDOUT. */
11         String rev = "";
12
13         for (int i = A.length() - 1; i >= 0; i--) {
14             rev = rev + A.charAt(i);
15         }
16
17         if (A.equals(rev))
18             System.out.println("Yes");
19         else
20             System.out.println("No");
21     }
22 }
23
24
25
```

QUESTION 5

```
1  import java.util.*;
2  class Sports{
3
4      String getName(){
5          return "Generic Sports";
6      }
7
8      void getNumberOfTeamMembers(){
9          System.out.println( "Each team has n players in " + getName() );
10     }
11 }
12
13 class Soccer extends Sports{
14     @Override
15     String getName(){
16         return "Soccer Class";
17     }
18
19     // Write your overridden getNumberOfTeamMembers method here
20     @Override
21     void getNumberOfTeamMembers() {
22         System.out.println("Each team has 11 players in Soccer Class");
23     }
24 }
25
```
