Q1 Sum and Average

10 marks

Write a Java program to find the sum and average of five numbers. Get the input from the user.

Your Code

```
1 import java.util.Scanner;  
2  
3 public class Main {  
4     public static void main(String[] args) {  
5         Scanner sc = new Scanner(System.in);  
6         int sum = 0;  
7         for (int i = 0; i < 5; i++) {  
8             sum += sc.nextInt();  
9         }  
10        double average = sum / 5.0;  
11        System.out.println("Sum = " + sum);  
12        System.out.println("Average = " + average);  
13    }  
14 }
```

Input

5 6 7 4 5

Output

Sum = 27
Average = 5.4

Q2 Days Conversion

10 marks

Write a Java program to convert the given number of days into years, months, weeks and days.

Your Code

```
1 import java.util.Scanner;  
2  
3 public class Main {  
4     public static void main(String[] args) {  
5         Scanner sc = new Scanner(System.in);  
6         int totalDays = sc.nextInt();  
7  
8         int years = totalDays / 365;  
9         int remaining = totalDays % 365;  
10        int months = remaining / 30;  
11        remaining = remaining % 30;  
12        int weeks = remaining / 7;  
13        int days = remaining % 7;  
14  
15        System.out.println("Years: " + years);  
16        System.out.println("Months: " + months);  
17        System.out.println("Weeks: " + weeks);
```

Input

578

Output

```
Years: 1  
Months: 7  
Weeks: 0  
Days: 3
```

Q3 Voting Eligibility

10 marks

Write a Java program to check whether a person is eligible for voting. If not, display how many years are left.

Your Code

```
1 import java.util.*;  
2  
3 public class Main {  
4     public static void main(String[] args) {  
5         Scanner sc = new Scanner(System.in);  
6  
7         System.out.print("Enter age: ");  
8         int age = sc.nextInt();  
9  
10        if (age >= 18) {  
11            System.out.print("Eligible for voting");  
12        } else {  
13            System.out.print("Not eligible. Years left: " + (18 - age));  
14        }  
15  
16        sc.close();  
17    }  
18 }
```

Input

17

Output

```
Enter age: Not eligible. Years  
left: 1
```

Q4 Income Tax

10 marks

Write a pseudocode to calculate employee income tax based on the given tax slabs. Input: Employee Number, Employee Name and Salary.

ANNUAL INCOME TAX(RS)

<500000 0

5L TO 7.5 L 5%

7.5L TO 10L 7.5%

10L TO 15L 10%

15L TO 20L 15%

>20L 20%

THE INPUTS ARE EMP NO, EMP NAME AND SALARY AND CALCULATE THE TAX FOR THE EMPLOYEE

Your Code

```
1 import java.util.Scanner;
2
3 public class Main {
4     public static void main(String[] args) {
5         Scanner sc = new Scanner(System.in);
6
7         int empNo = sc.nextInt();
8         String empName = sc.next();
9         double salary = sc.nextDouble();
10
11         double annualIncome = salary * 12;
12         double tax;
13
14         if (annualIncome < 500000) {
15             tax = 0;
16         } else if (annualIncome >= 500000 && annualIncome < 750000) {
```

Input

101
nitish
40000

Output

Emp No: 101
Emp Name: Nitish
Salary: 40000.0
Income Tax: 0.00

Q5 Armstrong Number

10 marks

Write a pseudocode to check whether the given number is an Armstrong number or not.

Your Code

```
1 import java.util.Scanner;
2
3 public class ArmstrongNumber {
4     public static void main(String[] args) {
5         Scanner sc = new Scanner(System.in);
6
7         int n = sc.nextInt();
8
9         int temp = n;
10        int digits = 0;
11
12        while (temp != 0) {
13            digits++;
14            temp /= 10;
15        }
16
17        temp = n;
18        int sum = 0;
19
20        while (temp != 0) {
21            int digit = temp % 10;
22            sum += Math.pow(digit, digits);
23            temp /= 10;
24        }
25
26        if (sum == n) {
27            System.out.print("Armstrong");
28        }
29    }
30 }
```

Input

153

Output

Armstrong
